

HealthScope AI

Predict.Prevent.Protect.

Subhrajeet Bhattacharjee Anusmriti Sinha Roy
Anshuman Katyan Jha Angshuman Karmakar

THE RAISON D'ÊTRE

Why WE built this?

- **Fragmented Data** → Health records, lab reports, and vaccination **data** are **scattered** and **disconnected**.
- **Reactive Approach** → Outbreaks and risks are detected only **after they spread**.
- **Access Inequality** → **Patients**, especially in **underserved** areas, lack **easy access** to **doctors**, **awareness**, and **support**.
- **Poor Coordination** → NGOs, hospitals, and government bodies often work in silos.
- **Policy Blind Spots** → **Policymakers lack real-time insights** to act early and efficiently.

THE SOLUTION

HealthScopeAI

From patient to policymaker — one ecosystem, one truth, powered by AI.

 **PATIENT** → Uploads vitals or lab report → AI explains in simple terms & provides a personalized risk score + SOS button.

 **DOCTOR** → Receives flagged urgent cases → AI gives explainable predictions & patient timelines → faster, better decisions.

 **NGO** → Sees community health heatmaps → allocates resources, plans outreach & preventive camps.

 **HOSPITAL** → Monitors bed availability, outbreaks & inventory → manages admissions & responds to demand.

 **GOVERNMENT & POLICYMAKERS** → Real-time vaccination analytics, outbreak forecasts, and efficiency reports → design better health programs, fund targeted R&D.

TECH STACK

OUR USP

01

Unified ecosystem → brings all stakeholders on **one platform**.

02

AI-powered insights → risk predictions, layman report explanations, outbreak alerts.

03

Inclusive design → **multilingual** education + accessibility for **underserved communities**.

04

Scalable → modular **dashboards** for every user in the **ecosystem**.

WHAT'S NEW

“Smart categorization meets
personalized healthcare recommendations”.

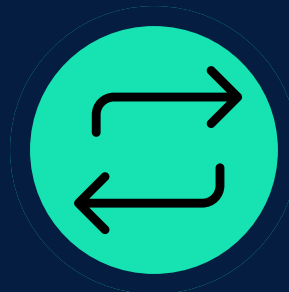

GOVERNMENT DASHBOARD

→ AI-powered vaccination analytics in real time, outbreak tracking, and effectiveness analysis.

DISEASE SURVEILLANCE

→ Early outbreak alerts leading directly into R&D for better vaccines and treatments.

POLICY SUPPORT

→ Policymakers now get actionable data to optimize healthcare campaigns

LOCATION MAPPING HEATMAPS

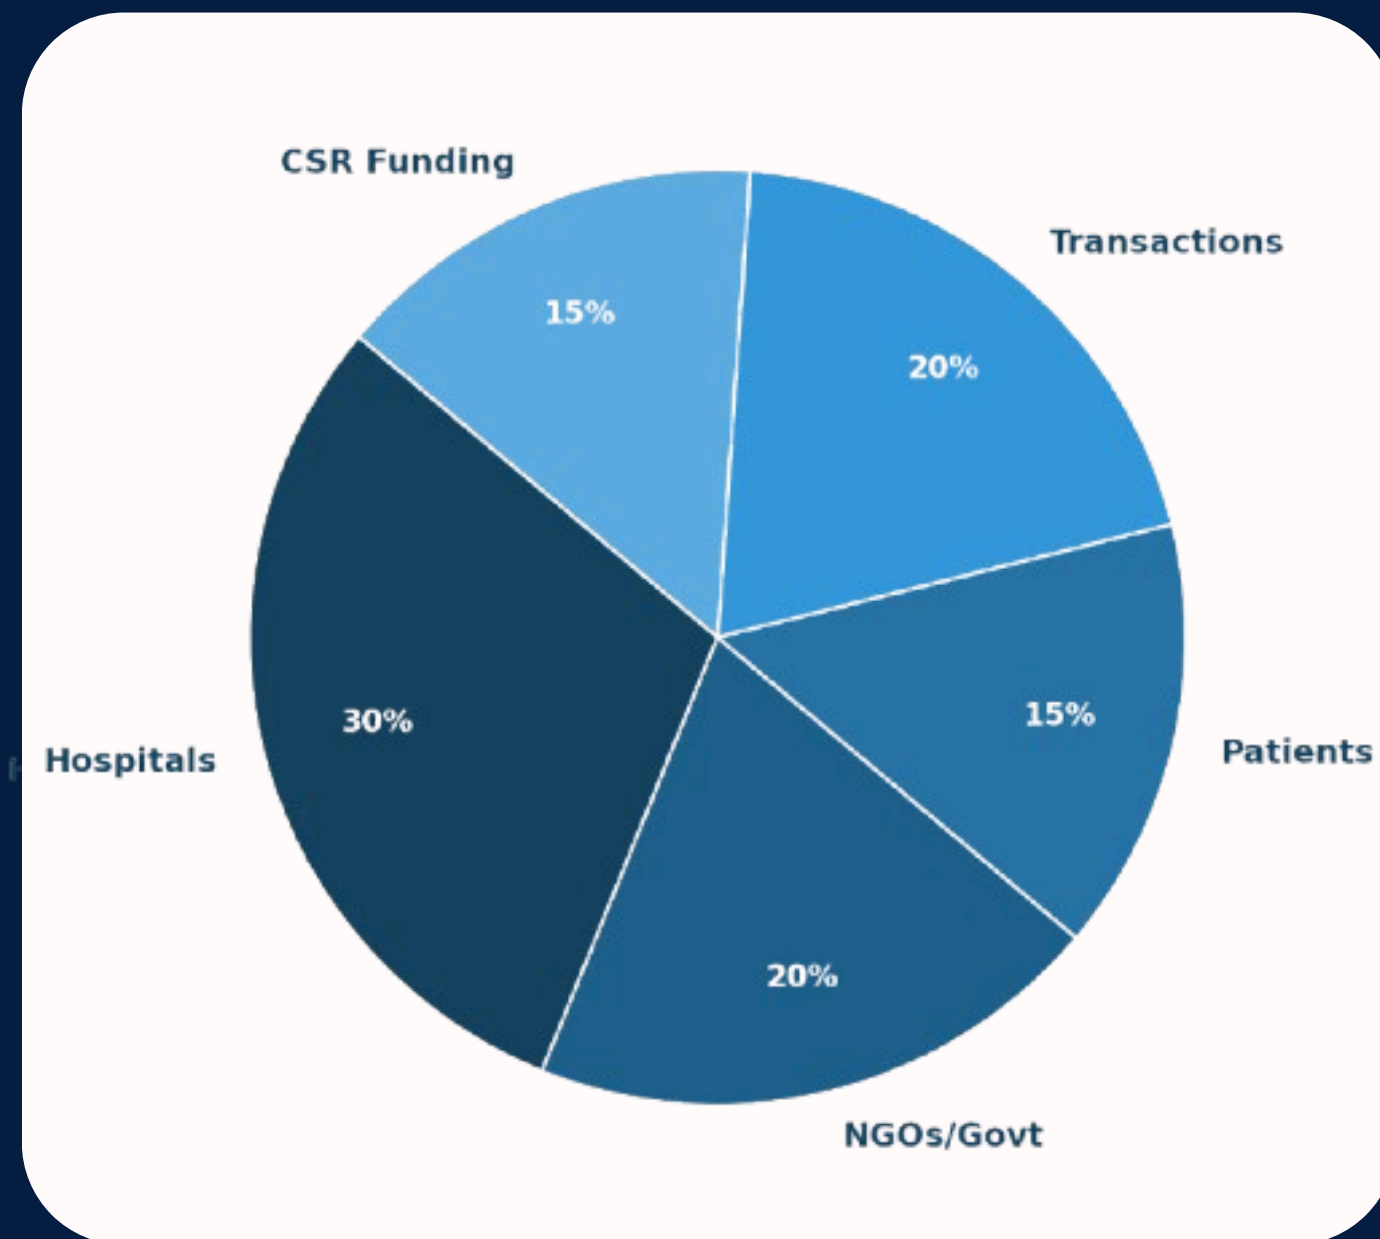

→ Community-level insights to allocate resources more effectively.

AGE-WISE CATEGORIZATION

Smarter insights by grouping health data and risks across different age brackets. AI-driven vaccination & healthcare advice tailored to symptoms, history & age.

REVENUE MODEL

HOSPITALS

Subscription SaaS → dashboards & AI tools.

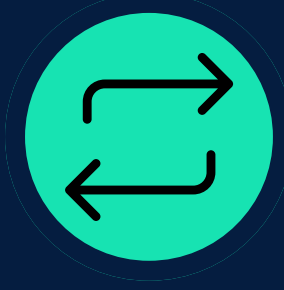

NGOS/GOVERNMENTS

Premium analytics for campaigns & planning.

PATIENTS

Freemium → free basic app, upsell teleconsults & preventive packages.

TRANSACTIONS

Small % from lab tests, pharmacies, insurance claims.

CSR FUNDING

Unique NGO tie-ups attract corporate CSR, making it sustainable.
